Whiteness HP Automixx

Hydrogen peroxide whitening gel at 6% for in-office use.

- Yields 3 to 4 applications (both arches).
- 1 application of 30 minutes per session.
- Gel in blue color: easy to see during application.
- Contains calcium: remineralizing action.
- Pleasant Blue Mint essence.
- Excellent consistency: easy to apply and does not run off.
- Self-mixing system: mixing of the two phases during application.
- No need to be activated by light.

(FGM)

White Class

Hydrogen peroxide whitening gel at 6%, 7.5%, and 10% for supervised at-home use.

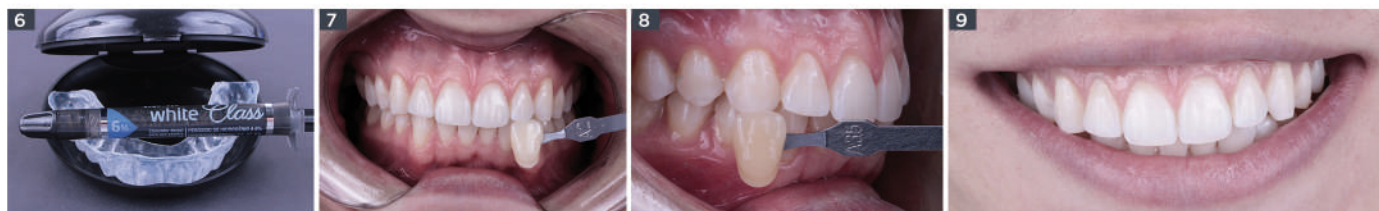

- The best desensitizing package on the market: potassium nitrate and sodium fluoride.
- Excellent viscosity: does not run off the dental tray.
- Calcium: avoids demineralization.
- Shorter daily usage time.
